HP Telecommuter Solutions

Around the world, millions of people now work from home offices, remote work areas, and other spaces outside of traditional office environments.[1]

Multiple trends are driving this fundamental shift in the way people work. Organizations are working to reduce real estate requirements, give employees greater flexibility to accommodate off-hours meetings with global teams, enable emergency readiness plans, and take advantage of technology improvements.

What if you could…

Reduce real estate costs, lower corporate energy consumption, and drive down employee overhead costs while improving corporate real estate utilization rates?

Improve worker flexibility, productivity and retention?

Enable the increasing globalization of your workforce?

Address the changing needs of continuity of operations—from pandemic outbreaks to weather-related incidents?

Provide telecommuter-specific multifunction devices, individualized service packages, and world-class management software?

In addition to reducing the need for expensive office space, telecommuting drives many tangible and intangible benefits. It can help organizations conserve energy and reduce their carbon footprints, improve worker productivity, and give employees a better work/life balance.

To support the needs of your remote workers, HP offers a broad portfolio of imaging and printing products, services, and solutions designed with telecommuters in mind.

Solution at a glance

HP can provide your remote workers with the highly reliable and productive printing and imaging devices, optional HP Care Pack services, and support they have come to expect in the office. The telecommuter portfolio includes HP-recommended printers and multifunction devices, award-winning monitoring and management via HP Web Jetadmin software.

For telecommuters, HP recommends:

• HP LaserJet Pro M1536dnf MFP for black-and-white documents

• HP Officejet Pro 8500A e-AiO (ePrint enabled); HP Officejet Pro 8500 AiO; HP Officejet 6500 AiO[2] for high quality, low-cost color documents

• HP LaserJet Pro CM1415fnw color MFP for reliable, laser-quality color documents

These cost-effective devices can offer minimal impact on the environment, are easy to install and maintain, and provide the professional print quality you've come to expect from HP. The HP Officejet Pro, LaserJet Pro and HP Officejet 6500 All-in-One Printer products provide multifunction (print, scan, fax, copy) capabilities that help enable business productivity from home.

Leveraging HP Web Jetadmin

HP LaserJet and Officejet Pro tele-commuter devices are designed to leverage the remote monitoring and management capabilities of HP Web Jetadmin software.

Print administrators and IT managers can use HP Web Jetadmin to view and configure telecommuter printers for easy remote troubleshooting and to generate reports detailing device and supply utilization, inventory, printer usage by group, and more.

HP at work around the world

An international food manufacturer has offices, production facilities, and distribution centers around world. As it acquires companies, its real estate and overhead costs—such as heating, cooling and power—increase. Tele-commuting and work space consolidation help the company reduce real estate holdings and overhead, address the expanding requirements for business meetings outside of non-traditional work hours, and offer flexible work options for employees. With HP-recommended telecommuter devices, support and services, employees are able to work from home offices, or potentially from company-owned store fronts and other remote locations, with the efficiency and expectation of quality printing that they experience in the office.

HP three-part approach

HP works with you to assess, deploy and manage an imaging and printing environment tailored to meet your business needs, while helping you reduce costs, conserve resources and simplify document-intensive processes.

| Optimize infrastructure	Manage environment	Improve workflow
HP can help you achieve a balance between your total cost of printing and your needs for user convenience and productivity.	Working together, HP can help you maintain your optimized infrastructure while improving business efficiency and tightening security.	By streamlining your document-intensive processes, HP can help you deliver a more efficient environment for capturing, managing and sharing information.
